This confession shows the true feeling of many southern whigs towards the President. They hate him without a cause, and they hate him all the more because he will not give them any excuse for hating him. But we do not believe that this feeling is general among all the whigs of the South. Many of them admit that the President has done well, and like true patriots will give him their support. The recent election in North Carolina shows that thousands of southern whigs will hereafter support the President and his administration, and although northern whigs, abolitionists, free-soilers, and know-nothings may combine against the President, the people-the real honest and patriotic masses of the country-will triumphantly sustain him.
